

DDR-125-62

25 April 1962

MEMORANDUM FOR: Director of Communications

THROUGH : Deputy Director (Support)

SUBJECT : Secure Telephone Service

REFERENCE : Memorandum from Director of Communications,  
9 April 1962, subject: Secure Telephone Service  
(Ciphony)

Following recent conversations between members of our respective  
staffs, I am hereby confirming the DD/R requirements for secure telephone  
service in the foreseeable future.

a. As you know, certain activities of the Special Projects  
Office of the DD/R are generating quite extensive secure telephone  
requirements, all of which, I believe, are known to members of  
your staff. A list of these is attached (DPD 2806-62).

25X1A b. As you know, OSI requires secure telephone service to  
██████████ Your staff is, of course, already at work on this require-  
ment.

c. I reconfirm my desire that the Special Projects Office have  
two stations on the KY-5 net. I also desire a station in my office  
when I have moved into permanent space.

d. Further requirements may arise as a result of certain  
organizational changes proposed within the Agency. I am not able  
to comment further on these now, but I think it is fair to say that  
they would generate perhaps one or two additional requirements  
in the Washington area.

SIGNED

HERBERT SCOVILLE, Jr.  
Deputy Director  
(Research)
